EDUCATION

University Institute of Engineering and Technology
B.E. – Electronics & Communication Engineering

Aug. 2023 – May 2027
Chandigarh

EXPERIENCE

Open Source Contributor

Aug. 2026 – Present

Appwrite / Software / Open Source

Remote

- Developing Hugging Face OAuth2 provider support within Appwrite's authentication system.
- Collaborating with maintainers through technical discussions, debugging, API investigation, and iterative implementation.
- Submitted a draft PR; feature is currently under active development.

Open Source Contributor

Feb. 2026

Learning Unlimited / E-Learning / Edtech / Open Source

Remote

- Resolved a critical data corruption issue by enforcing architectural invariants in the Django administration panel, preventing system-wide crashes during recovery of deleted QuasiStaticData components. PR #4438.
- Automated administrative workflows by capturing active user session hooks to populate metadata fields, eliminating manual tracking workflows. PR #4430.

PROJECTS

AI Resume Analyzer

GitHub | Live

React, TypeScript, React Router v7, Puter.js, AI/LLM Integration

- Built an AI-powered resume analyzer to evaluate resumes against specific job descriptions and generate ATS scores, skill gaps, and targeted improvement suggestions.
- Implemented resume upload, cloud storage, browser authentication, and Zustand-based client state management.
- Built a responsive, reusable interface with Tailwind CSS and modular React components.

AI Book Library

GitHub | Live

Next.js, TypeScript, MongoDB, Mongoose, Vercel Blob, Vapi AI, ElevenLabs

- Built and deployed an AI-powered document platform for PDF ingestion, semantic search, AI-generated summaries, and voice-based interaction.
- Developed secure authentication and subscription workflows with Clerk and backend APIs using Next.js, MongoDB, and Mongoose.
- Integrated Vercel Blob for cloud storage and used Linux (Ubuntu/WSL), Git, and CodeRabbit CLI for development and debugging.

ChatApp

GitHub | Live

React, Node.js, Socket.io, WebSockets, JWT, REST APIs, Zustand

- Designed a real-time messaging platform supporting concurrent users through Socket.io and WebSockets.
- Implemented JWT authentication, authorization, and REST APIs for secure communication.
- Built scalable client-state management with Zustand and optimized error handling for production deployment.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL

Frontend: React.js, Next.js, React Router, Tailwind CSS

Backend: Node.js, REST APIs, API Development

AI / GenAI: LLMs, RAG, Prompt Engineering, AI Agents, Vapi AI, ElevenLabs

Databases & Tools: MongoDB, Mongoose, Git, GitHub, Docker, Vercel, Vercel Blob, Linux/WSL
